

Lockers that can be unlocked remotely

Overview

A smart lock is an electronic locking system that allows users to lock and unlock doors remotely, without needing physical keys. Shop products from small business brands sold in Amazon's store. Explore options with app. The eLinkSmart Fingerprint Lock redefines convenience by making your finger your key. It's incredibly fast, unlocking in just 0.2 seconds, which is a huge step up from traditional locks. Plus, its app control via Bluetooth means you can manage fingerprints, check unlock records, and even share. [Upgraded Design]: Our Matrix II key lock box is built with high grade zinc alloy, a new and improved design which includes a protective hood, with weatherproof materials giving you the assurance that your keys and valuables are safely stored. A live access log lets you know who is opening the lockbox and when anyone tries.
