Loowatt toilet system

Overview

The Loowatt toilet is a dry-toilet that seals waste into a biodegradable film for transport and further processing, creating either energy or fertilizer. When the container is full, the servicing team swaps it out for a new one. [1][2][3][4][5] In 2012, the company started a. Loowatt System™ is a revolutionary waterless flush toilet system that tackles water scarcity and sanitation challenges by utilizing a patented sealing mechanism to package waste in biodegradable film.
