Mainstream base station power supply

**LPR Series 19'
Rack Mounted**

Overview

Modern base stations increasingly host servers for latency-sensitive applications, increasing rack power density from 5kW to 15kW per unit. This drives adoption of three-phase 380V AC power systems with 98% efficiency ratings and redundant configurations. The market is segmented by application (4G and 5G base stations) and type (All-in-One and Distributed power supplies), with the 5G base station segment expected to witness significantly higher growth due to its ongoing global rollout. Key players like ABB, Huawei, and Delta are investing heavily in. Power supplies can be employed in each of the three systems that compose wireless base stations. In Stock, Ready to Ship!
