Mauritania environmental sustainability

Overview

Mauritania faces several environmental threats such as drought, desertification, deforestation, bush fires and the deterioration of its ecosystems. The Environmental Performance Review (EPR) of Mauritania builds on the substantial experience accumulated by the Economic Commission for Europe (ECE) and its member States in using the EPR tool to regularly assess progress achieved in reconciling national economic and environmental objectives. The. Mauritania is only responsible for 0. 68,64% of its emissions comes from agriculture, forestry and other land uses (AFOLU). While 40% of electricity is produced via renewable energy, only 47. Thereby the country program is contributing to the achievement of national development goals and the overall PEI Programme outputs.
