Overview

This is an integrated district dataset which is main from Chong Aih's MSc project, accessible on Github [1]. These tools are designed to inform high level thinking around micro-grid load and tariff considerations in sub-Saharan Africa. There are two related tools in this dataset: 1. Microgrid REopt LCOE Results Explorer. The purpose of this tool is to display levelized cost of electricity (LCOE) modeling. This study presents the SDN-MG25 dataset based on a realistic microgrid-SDN testbed. These data should not be used for commercial purposes.

Microgrid load dataset

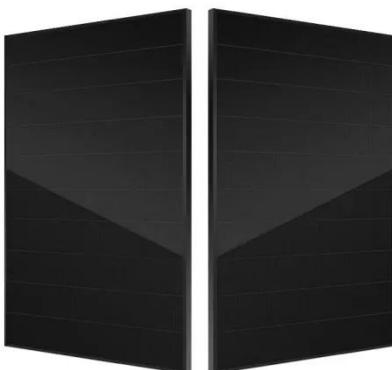

Open-source multi-year power generation, consumption, and storage ...

We compiled, quality controlled, and released publicly a comprehensive power dataset of parts of the University of California, San Diego microgrid.

Prediction-Free Coordinated Dispatch of Microgrid: A Data-Driven ...

This dataset includes 5-minute-interval data on WT, PV, load, and electricity prices, as well as detailed configurations of a microgrid.

Power Data from Microgrid

It contains measurements of voltage, current, power, and energy for microgrid's components. This dataset consist of 18 features and was collected over the past 15 months. The dataset is valuable for ...

FLYao123/District-microgrid-dataset

This is an integrated district dataset which is main from Chong Aih's MSc project, accessible on Github [1]. This open dataset contains hourly load, market price and PV generation data of a microgrid in US.

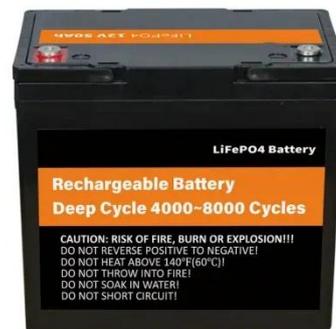

A multi-scale time-series dataset with benchmark for machine

In this paper, we present PSML, a first-of-its-kind open-access multi-scale time-series dataset, to aid in the development of data-driven machine learning (ML)-based approaches towards ...

Load data for the Microgrid System.

Load data for the Microgrid System. This work presents a methodology for optimal compensation of reactive power in Electric Microgrids using a multicriteria decision algorithm based on

Open Data Sets - IEEE PES Intelligent Systems Subcommittee

Public data sets on household energy consumption data into individual appliances, also known as Non-intrusive Appliance Load Monitoring (NIALM) or

energy disaggregation. A dataset of sensor and ...

Microgrid Load and LCOE Modelling Results , NLR Data Catalog

The purpose of this tool is to display levelized cost of electricity (LCOE) modeling results for representative micro-grid systems serving a rural village with 100 micro-grid connected homes, two ...
