

Overview

Lithium titanate battery (LTO) outperformance in fast charge (5C-30C), longer battery life (>7000cycles), wider working temperature (-40°C-70°C) and excellent safety compared with other carbon-based lithium battery. Choose from prismatic. Lithium Titanium Oxide Battery (LTO) is a modified lithium ion battery of voltage 2.9V which uses LTO material as cathode, and LiMn₂O₄, NiCoMn, LiFePO₄ material as anode. It has over 80% capacity only charging within several minutes, and has good over-discharging resistance and anti-reverse charging protection, so there is no safety. HAKADI Battery offers LTO battery cells for high rate and high cycle life applications. Charge current: Standard Charging/Discharging: 0.5C. Meanwhile, it has three-dimensional lithium-ion transmission channel, which can charge and discharge at high rate; full.
