

Name of the photovoltaic accessories assembly bracket

Overview

At present, there are 3 types of brackets used in most PV power plants: fixed conventional bracket, adjustable tracking bracket and flexible PV bracket. They remain unchanged after installation. Photovoltaic bracket can be classified in the form of connection mode, installation structure and installation location. They carry the power generation body of photovoltaic power stations. It is environmentally friendly as well. To track the trajectory of the sun, slides and accessories can also be equipped with transmission and. Your solar power system requires the proper support system of solar panel mounting brackets.
