

# **Nepal reduced carbon emissions**

## Overview

---

19 billion from the Global Forest Carbon Partnership Fund after successfully reducing carbon dioxide emissions by about 1. Nepal has reduced carbon emissions through the 'REDDPlus' emission reduction program under the Terai Arc region. The country has received Rs 1. Nepal's goal is to achieve net zero emissions from 2020-2030 and after a period of very low emissions to full net zero by 2045. The new regulation could be a game-changer for the country's development trajectory, inviting not only. Nepal's comprehensive strategy for achieving its ambitious net-zero emissions goal, primarily targeting net-zero by 2045, relies on a multi-faceted approach involving aggressive mitigation interventions, significant institutional transformation, and massive conditional investment, as outlined in. At COP26, Nepal announced its commitment to carbon neutrality by or before 2045. The government submitted its Long-Term Strategy which outlines two GHG mitigation scenarios: the WAM (with additional measures) and the WEM (with existing measures) for achieving carbon neutrality by or before 2045. Anil Kumar Sinha, Minister for Energy, Water Resources, and Irrigation, emphasized the importance of continuous collaboration among all stakeholders for the effective implementation of the Government of Nepal's goal of providing accessible, reliable, sustainable, and modern energy for all, as. Kathmandu: At COP26 in 2021, Nepal announced an ambitious net-zero carbon emissions target.
