Overview

Battery inverters, as key devices in modern energy systems, play an important role in converting direct current (DC) to alternating current (AC). Back in the 1950s, KACO was the world's largest manufacturer of electromechanical choppers and developed the first thyristor inverter. After the spin-off from the traditional automotive brand KACO, we used these roots to launch the world's first transformerless solar PV inverter on the market in Shanghai JINSUN New Energy Technology Co. We specialize in wind power generation systems, photovoltaic power generation systems, wind-solar hybrid power generation systems, battery energy storage. Our inverter/chargers integrate decades of Victron innovations and continuously improve with new features and enhanced integration options. In this article. The stackable battery ranges 4. Its pure sine wave inverter delivers a steady 600W and peaks at 1200W, handling everything from small appliances to sensitive electronics without hiccups. The 92% efficiency really makes a difference, cutting down.
