

# New policy for rural solar power generation

Voltage range

**636V-876V**

Rated voltage

**768V**

Cell type

**Lithium iron phosphate**

## Overview

---

The new rules eliminate USDA support for large solar farms on prime farmland and ban foreign-manufactured panels in all funded projects. Department of Agriculture announced sweeping changes to renewable energy funding this week, fundamentally reshaping access to federal solar incentives for rural America. Within the last 30 years, Tennessee alone has lost over 1. This problem is not just in. USDA's new anti-renewable energy policies restrict farmers' choices over their own land under the banner of 'protection. Department of Agriculture (USDA) and U. Based on feedback, USDA and DOE recommitted. Maximizing the positive benefits for farmers and farm communities while minimizing the negative impacts on farm viability will require the enactment of proactive policies—especially by state and local governments responsible for land use decisions. It's exciting to see how thoughtful regulations and incentives can spark real change and improve lives in areas that need it most.
