Old solar energy storage battery

Overview

Regular batteries can't handle solar storage because they're designed for short bursts of energy, not the continuous charging/discharging cycles that solar systems require. 5-megawatt solar farm uses the sun's rays to slowly charge nearly 600 batteries in nearby cabinets. At night, when energy demand rises, that electricity is sent to the grid to power homes with clean energy. To make. Some old batteries can store solar energy, but most car or regular batteries aren't suitable.
