Oman Solar Folding Container Mobile Type for Farms

Overview

The container integrates 196 photovoltaic modules that can be electrically deployed and retracted in less than 30 minutes. The aluminum rail system, both lightweight and environmentally friendly, ensures a mobile solution with rapid commissioning. We are pleased to announce the successful deployment of a SolarContainer in Oman, where it is now supplying clean and autonomous energy for a mobile Oil & Gas site. Realized in close collaboration with GreenTech Energy and Water, this project highlights how flexible solar infrastructure can support. The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. Ideal for remote areas, emergency rescue. This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.
