Outdoor base station AP cannot log in

Overview

Try to connect to the Internet from a desktop or laptop computer that is connected directly to your Wi-Fi router with the Ethernet cable. Make sure you have the latest version of the Wyze app here. Newer Arlo base stations have a single LED, while older base stations have three or five LEDs. If you are not at the same location as your base station, launch the Arlo app or. The LED indicator on the Base Station is your first clue: If your Base Station is stuck on yellow or isn't showing up in the app, it's time to troubleshoot. I use a Unifi system with 3 wireless APs. No solid yellow, no solid blue, just flashing blue.
