### Supercooled erythritol for high-performance seasonal thermal energy ...

To enable high-performance seasonal thermal energy storage for decarbonized solar heating, the authors propose an effective method to realize ultrastable supercooled erythritol, with an

### Highly efficient photovoltaic energy storage hybrid system based on

Herein, a novel configuration and combination of materials for an IPSC, theoretically affording a maximized areal capacitance of 2.35 mF cm<sup>-2</sup> and exceeding a 25% overall photo ...

### Big Data Feature Mining Method for Energy Storage System of

The energy storage system can effectively solve the challenges brought by the high proportion of renewable energy access to the power grid. In this paper, a big data feature mining ...

Sheng Yang's research works ,

## Central South University, Changsha

...

The rapid development of battery energy storage technology provides a potential way to solve the grid stability problem caused by the large-scale construction of nuclear power.

## A coordinated planning strategy of energy storage allocation and line

Abstract Random integration of massive distributed photovoltaic (PV) generation poses serious challenges to distribution networks. Voltage violations, line overloads, increased peak-valley ...

## Optimal configuration and economic operation of energy storage ...

Abstract: The outstanding photovoltaic (PV) abandonment problem can be effectively solved by configuring energy storage (ES). The capacity configuration and operation control strategy of ES are

...

## Impact of large-scale photovoltaic-energy storage power generation

This paper analyzes the adaptability of the phase current difference mutation and the sequence component phase

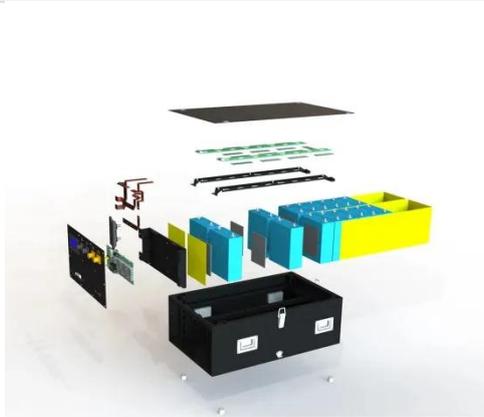

selection component in protecting the Photovoltaic (PV) power plant side of the

...

## Recent Advances in Integrated Solar Photovoltaic Energy Storage

This review starts with a detailed analysis of the photoelectric conversion mechanism underlying integrated photovoltaic energy storage systems.

## Sheng YANG , Doctor of Engineering , Zhejiang University, Hangzhou

Seasonal storage of solar thermal energy through supercooled phase change materials (PCM) offers a promising solution for decarbonizing space and

water heating in winter.
