

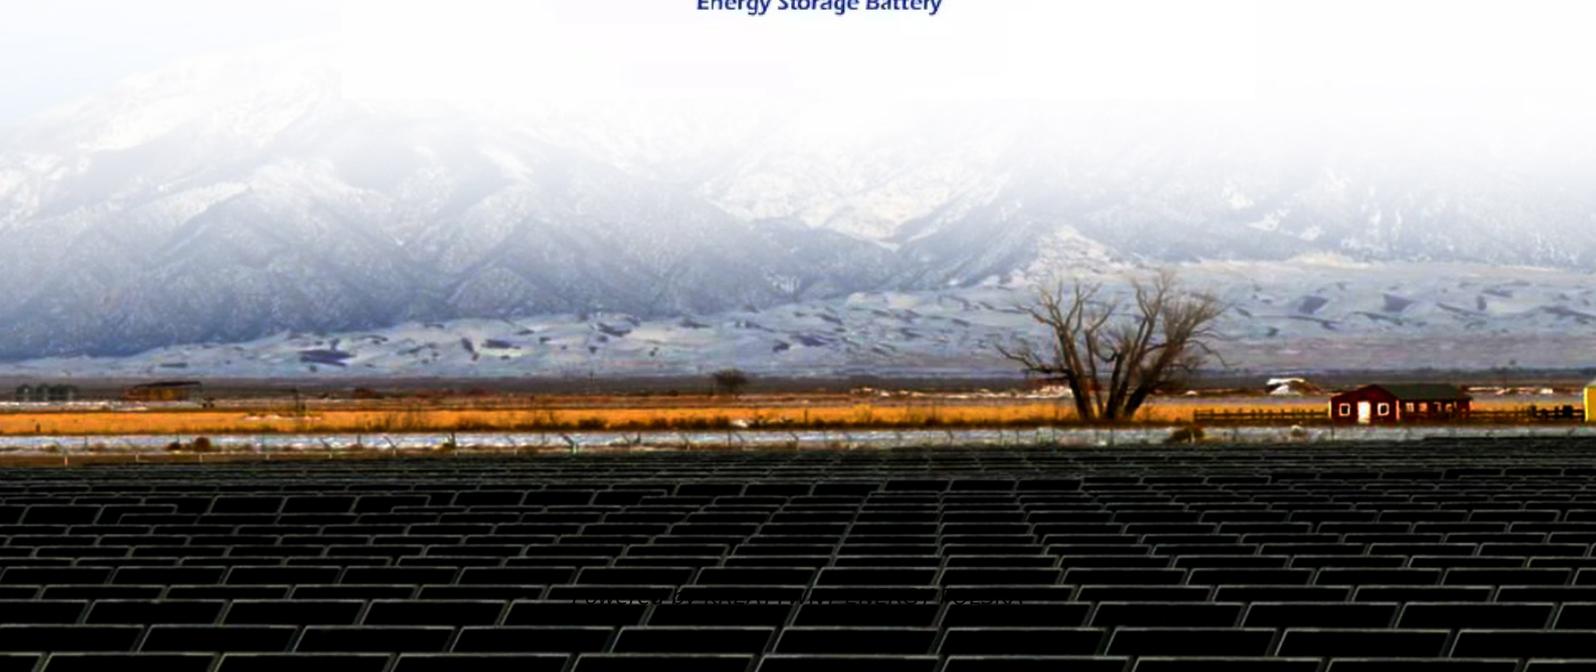

Photovoltaic bird repellent base plate

Overview

The BASIC series is suitable for installation concurrent with the construction of new photovoltaic systems. System optimized to ensure maximum value for money. Want to stop birds nesting under your solar panels?

The perfect solution is available from Van der Valk Solar Systems: the BirdBlocker! This effective product is easy to install on practically every type of PV-panel with a Valk base profile and deters birds from nesting there. The solar panel bird deterrent is designed to prevent pest birds from accessing the area beneath solar arrays. Birds can cause serious problems, including broken cables, fire hazards, and reduced panel efficiency. These issues not only harm your solar panels but also threaten bird welfare. Why Do Birds Nest Under Solar Panels?

Birds are drawn to the shaded, protected spaces beneath. The utility model discloses a bird repellent device suitable for a photovoltaic power station, which comprises a photovoltaic plate, wherein a first locking knob is arranged on the outer wall of a support sleeve.
