# Photovoltaic bracket Zhao Lei

## Overview

---

**Abstract:** In order to study the mechanical properties of the fixed photovoltaic bracket and its failure under wind load, the full-scale photovoltaic bracket specimen was designed and the destructive test was carried out by means of static loading. The invention discloses a photovoltaic bracket. The bracket comprises a photovoltaic panel supporting frame and a plurality of lower supporting frames, wherein each lower supporting frame has a base, a first upright column, a second upright column and a diagonal brace; each first upright column. The power generation capacity. In order to fully compare and analyze the technical economy of various types of brackets to guide engineering practice, this paper selects fixed, fixed adjustable, flat uniaxial, oblique uniaxial and biaxial five types of brackets as the research object, taking Ning. TL;DR: In this article, a photovoltaic tracking bracket elastic damping type counterweight mechanism is proposed to counter the eccentric torque of the photovoltaic cells of a single-shaft. Fuwen Zhao currently works at the Institute of Chemistry, Chinese Academy of Sciences. She is now a master student in Biological Science & Medical Engineering, Southeast University. Her research focuses on the construction and lasing mode modulation of. Photovoltaic support, also known as solar panel support, is an important equipment used to install and support solar panels in solar photovoltaic power generation systems. The company occupies an area of 24 acres and has a full set of production lines for anti-seismic support and hanger accessories. Hebei Jingzhao Fastener Group Co.
