Photovoltaic bracket installed on sloping roof

Overview

Pitched Roof Mounting refers to the installation of solar panels on roofs that have a slope or incline. When adding any type of solar array on the roof of a newly constructed house, it is important to choose an appropriate and well-designed racking and mounting system that can provide structural support to the solar modules and to properly flash the mounting blocks and integrate the flashing with the. Many homeowners with sloped roofs face a key question when considering solar power systems: Which mount is right for an inclined roof?

Many homeowners with sloped roofs face a key question when considering solar power systems: Which mount is right for an inclined roof?

This is a critical decision. For example, roofs with a pitch of 30 to 45 degrees often perform well for solar harvesting. Professional installation typically includes 5-25 year warranties and ensures compliance with 2025.
