Photovoltaic inverter extended warranty charges

Overview

Some manufacturers offer extended warranties for an additional cost, but coverage varies. These inverter warranty periods protect you from defects and premature failures, but the process for filing claims isn't. String inverters typically come with 10-12 years of warranty coverage, whereas microinverters and power optimizers are often covered for 25 years. Labor and shipping expenses are generally not included in solar inverter warranties, but some of the strongest brands will cover one or both of these. The SolarEdge inverter warranty is extendable to 20 or 25 years, depending on inverter model. Reliability, a long service life and sustainability play a crucial role for PV system owners – just like they do for Fronius.
