Photovoltaic panel cost in 2025

Overview

In 2025, solar cell prices for residential users range from $2. 80 per watt, but this can vary by the location and size of the system, as well as the complexity of the installation. Thus, a 6 kW solar cell system can cost between $16,800 and $22,800 even before. The total solar panel pricing in 2025 is not just the price of the panels alone. It is the combination of both hard and soft costs. Larger systems have higher upfront costs, but they reduce price per watt due to economies of scale. As a leading resource in residential solar solutions, RenewGenius believes in empowering you with a comprehensive knowledge base. Thanks to improved energy production, declining costs, and government incentives, homeowners and businesses recognize solar energy as a smarter and more affordable.
