Photovoltaic panel replacement and maintenance plan

Overview

This guide considers Operation and Maintenance (O&M) of photovoltaic (PV) systems with the goal of reducing the cost of O&M and increasing its effectiveness. Reported O&M costs vary widely, and a more standardized approach to planning and delivering O&M can make costs more. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.nrel.gov. National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices. As a solar homeowner or someone considering a solar installation, maintaining your solar energy system is essential for optimal performance and longevity. A preventative strategy can include scheduled cleanings, component replacements, and system repairs. With the increasing reliance on solar power, the necessity for a structured solar panel inspection and maintenance checklist has never been more apparent.
