# **Photovoltaic panel street lights do not light up at night**

## Overview

---

Solar street lights can fail because of damaged solar panels, faulty batteries, or broken controllers. Check each component methodically. Start with the simplest steps, like inspecting the switches and wiring. This process reveals the root. Proper installation of the solar panels is essential for efficient charging and nighttime performance of the solar lights. Keeping the solar panels clean from dust or debris enhances their ability to convert sunlight. If a solar street light is not working, troubleshoot in this order: 1) Mode / schedule first — confirm it is in ON / Normal mode (not OFF / TEST) and check any timer / remote schedule. You'll also find expert insights on preventive maintenance and guidance on when to seek professional help to ensure your solar lighting. Solar street lights have become a cornerstone of sustainable development, illuminating urban and rural areas while reducing energy consumption and carbon footprints. Cleaning the panel with a soft cloth can greatly enhance its efficiency.
