# **Photovoltaic panels as rooftop rain shelter**

## Overview

---

As it turns out, solar panels provide a physical barrier for rain and wind that can actually prolong the life of a roof. A canopy is an overhead structure with open sides, designed primarily to offer protection from rain or sunlight. These structures are usually covered. Our weatherproof modules are the strongest commercially available and integrate easily into beautiful, highly efficient canopies, awnings, and walkways. Solar energy is a cornerstone of modern power solutions, offering a path to energy independence. Residential and commercial solar canopies offer dual functionality that traditional roof panels can't match - they generate clean. An expert from Florida-based First Choice Solar ran down a few ways that solar panels can actually protect a home's roof. "A lot of people think that solar panels can damage your roof," he states at the beginning of the video. "But solar panels actually protect your home, and specifically, your. A solar roof or rooftop photovoltaic (PV) system is a setup where electricity-generating solar panels are mounted on the roof, utilizing the prime exposure of the rooftop to sunlight and creating one of the most environmentally friendly roofs possible.
