Photovoltaic panels imported from the Netherlands

Overview

The Netherlands is the world's largest importer of solar panels; 89 percent of these solar panels come from China. Roughly 60 percent of the imports are re-exported to other countries. Statistics Netherlands (CBS) reports this in connection with the publication Dutch Trade in Facts and Figures. Chinese-manufactured solar photovoltaic (PV) panels are piling up in European warehouses, with approximately 40 gigawatts-direct current* (GWdc) of capacity currently in storage – the same amount installed across the continent in 2022. Last year, some €12 billion worth of solar panels entered the country, €2 billion more than the world's number two importer. Our report sheds light on Europe's and the Netherlands' positioning in a future solar PV value chain. In order to rebuild a Dutch solar PV supply chain, European collaboration is key.

Photovoltaic panels imported from the Netherlands

The Netherlands imports the most solar panels

Despite the high number of solar panels imported, and the growing interest in the technology due to high energy prices following the start of the war in Ukraine, the Netherlands only keeps around 40 percent ...

Netherlands is world's largest importer of solar panels - CBS

The Netherlands is the world's largest importer of solar panels, according to the statistics office CBS - although around 60% are re-exported, mainly to other EU countries.

Sellers in Netherlands , PV Companies List , ENF Company Directory

List of Dutch solar sellers. Directory of companies in Netherlands that are distributors and wholesalers of solar components, including which brands they carry.
