Photovoltaic panels on Apple headquarters building

Overview

Solar photovoltaic panels are installed on the circular rooftop, with a total installed capacity of 17MW, making it the largest rooftop photovoltaic building in the country. The project generates enough electricity to meet 100% of the building's power needs. Apple's brand new headquarters is quickly approaching completion. The 175-acre campus is costing the tech giant an estimated \$5 billion and will house roughly 12,000 employees once fully operational. The main building, what many have dubbed the "spaceship," is an incredible 2. And since 2011, all of Apple's renewable energy projects have. Apple's spaceship-like headquarters in Cupertino, California, is adorned in solar panels, a testament to the company's pledge to power its facility with 100 percent renewable energy. 6KWH Complete Solar Panel Kit 400W 12V for RV Off Grid: 4 * 100W. Apple announced that it will open its new 175-acre campus to employees beginning in April.
