Photovoltaic panels with the same number of pieces but different wattages

Overview

Yes, you can combine solar panels with different wattages in the same system, but it's generally not recommended due to efficiency losses. Though mixing different solar panels is not recommended, it's not forbidden and things would be ok as long as each panel's electrical parameters (voltage. The article discusses the possibility of mixing solar panels with different wattages. 12v, tracer bn 4215 controller.
