

Power plant energy storage system prices

Overview

Battery storage prices have gone down a lot since 2010. In 2025, they are about \$200-\$400 per kWh. This is because of new lithium battery chemistries. Different places have different energy storage costs. Ember provides the latest capex and Levelised Cost of Storage (LCOS) for large, long-duration utility-scale Battery Energy Storage Systems (BESS) across global markets outside China and the US, based on recent auction results and expert interviews. All-in BESS projects now cost just \$125/kWh as. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.nrel.gov. Cole, Wesley and Akash Karmakar.
