# **Power plant photovoltaic panel procurement**

## Overview

---

The Procurement phase covers purchasing components such as PV modules and inverters, as well as identifying and mitigating risks. It involves supplier selection and onboarding, and conducting inspections, and tests to qualify materials to be used in construction throughout the. This document has been published with the support of Andy Walker, Otto VanGeet, Tom Harris and Chandra Shah of the National Renewable Energy Laboratory (NREL). The enclosed technical template language is intended to provide only example language for agencies to consider in the process of assembling. Contracts are the most common form of contract used to undertake construction works on utility-scale solar projects by the private sector. <sup>1</sup> Under an EPC Contract, a Contractor is obliged to deliver a complete facility to the Project Company. This approach centralizes the project management, design. Procuring a solar electric system is a process similar to purchasing a new HVAC system, roof, or comparable property investment.
