## Overview

---

Now in its 16<sup>th</sup> edition, the report takes an in-depth look at technology trends across the supply chain for silicon PV products. VDMA calculates PV module shipments in 2024 at 703 GW, with average prices having dropped by 33% compared to the end of 2023. Monthly photovoltaic module shipments This table includes the total shipments, values, and average values of module shipments by year and month. This table is a compilation of annual Tables 2, 3, and 4. Among the first-tier players—the top four—Jinko Solar secured the top spot by a narrow margin, followed closely by LONGi Green Energy in second place. The two began to. of PV were added globally, bringing the cumulative installed capacity to 2. This week sees the publication of the annual ITRPV report, compiled by German engineering association. PVTIME – In terms of shipments in the first three quarters of 2024, there should be no suspense in the top 10 list of global PV module shipments, with Jinko Solar now leading JA Solar by around 10GW with shipments of 67.
