

# Riga electricity market trends

## Overview

---

In the Latvia retail electricity market, challenges include regulatory changes impacting pricing and competition, volatile energy prices due to market liberalization, limited infrastructure for renewable energy integration, and consumer reluctance to switch providers. In December 2025, the average electricity price in the Latvian bidding area decreased to EUR 83,85 per megawatt hour (EUR/MWh), which is 24% less than in November, while compared to December 2024, the price is 7% lower. Track energy spot rates and average hourly and daily power costs for the Latvian market. Feb

Optimize the performance of your electrical appliances and reduce your energy costs. Learn how to lower. Band DA: Consumption less than 999kWh, Band DB: Consumption from 1 000 kWh to 2 499 kWh, Band DC: Consumption from 2 500 kWh to 4 999kWh, Band DD: Consumption from 5 000 kWh to 14 999 kWh, Band DE: Consumption 14 999 kWh or over (5) Excluding taxes and levies, Excluding VAT and other recoverable. Latvia's electricity sector has seen remarkable transformation in recent years, with renewable energy now at the heart of both domestic supply and policy direction. 94 EUR/MWh, which is 6% higher than in October. The highest price reached.
