## Overview

---

Three architectures dominate: off-grid DC mini splits, hybrid AC/DC systems that take PV input directly, and grid-tied solar-assisted setups. Cut electricity costs and enjoy powerful heating and cooling with a hybrid solar-powered mini split system—perfect for off-grid homes, RVs, cabins, or energy-conscious homeowners. HYBRID SOLAR MINI SPLITS HEAT AND COOL YOUR HOME USING THE POWER OF THE SUN, ALL WHILE BEING BACKED UP BY THE GRID WHEN. A mini split is a ductless HVAC system that can heat and cool individual rooms or zones. Unlike traditional central air systems, they don't rely on ductwork. With a focus on sustainability and efficiency, this system is perfect for those looking to reduce their reliance on traditional utility. Hybrid Solar Power = Lower Bills: Stealth Solar Mini Split systems run on solar, grid, or both, automatically optimizing energy use for daytime savings and year-round comfort. Two Models, High Efficiency: Choose 12,000 BTU (22. The result: lower bills, smaller carbon footprints, and steadier comfort even when the grid is strained.
