

**KREATYWNY ENERGY POLSKA**

# **Rural solar power generation roof accident**

## Overview

---

FACE has recently investigated the deaths of three solar installers. Hazards that contributed to these deaths include pitched roofs, working too close to the roof's edge, lack of fall protection, proximity of overhead power lines, and unguarded skylights. On J, an employee was working on a roof-mounted solar panel system when he made contact with an energized electrical component. Keywords: Contact, Electrocuted, Energized, Functional. In 2019, falls caused over one-third of all construction fatalities. This highlights the need for stringent safety measures. The coroner has identified a 28-year-old man who was killed after he fell from a roof in Gurnee while installing solar panels Friday afternoon, which is under investigation by OSHA. The solar farm, covering an expansive 1,900 acres and located at the Muskegon County Resource. During the construction and operation of photovoltaic power stations, if they are not operated and maintained properly, fire accidents may occur! At present, the rapid coverage of photovoltaic power in rural areas raises concerns about fire risks.
