

Samsung plans to build a solar power plant

Overview

Samsung C&T Corporation is building a massive solar power plant in Indiana, USA. They are tightening the reins on expanding solar development projects, which they have pinpointed as a future growth engine. According to Samsung C&T Trading & Investment Group's renewable energy subsidiary in the United States has received a further boost in its efforts to expand its development of solar power, with the company recently signing a contract for 15 new projects in Texas. The Dukhan solar power plant, one of the largest in the world, will be developed in two. Samsung C&T's engineering and construction division won a 1. The state-owned global energy major expects the.
