

Sending batteries resulted in the site being fined

Overview

The FAA slapped Mobile Sentrix, based in Manassas, Virginia, with a \$170,000 civil penalty for tendering undeclared and improperly packaged shipments of mobile phone lithium-ion batteries to FedEx on four occasions last year, including one incident in which a small fire occurred. The FAA slapped Mobile Sentrix, based in Manassas, Virginia, with a \$170,000 civil penalty for tendering undeclared and improperly packaged shipments of mobile phone lithium-ion batteries to FedEx on four occasions last year, including one incident in which a small fire occurred. US FAA has proposed a \$170,000 civil penalty in response to several shipments containing lithium-ion batteries that the agency says were offered for transportation by air without proper packaging, markings, labels, or shipping documentation. The first cited violation occurred on Aug. The FAA fined three companies (Mobile Sentrix, Mokwheel Bikes, and LG Energy Solution) a total of over \$300,000 for shipping lithium-ion batteries that were undeclared, improperly packaged, and/or mislabeled, resulting in fires and safety hazards. In two of the incidents, a package of batteries caught on fire. These batteries are strictly regulated due to their potential flammability and thermal runaway risks.
