

Should photovoltaic panels be equipped with electricity meters

Overview

Yes, you can use solar panels without a smart meter, especially if you're off-grid. There are two main classes of electricity meters that your home or business could have: pass-through meters and CT meters. They tend to be larger in size, which makes them less suitable. At Solar Panels Newark, we help homeowners understand all aspects of their solar systems—including what type of electric meter they'll need and how it affects billing, usage tracking, and net metering eligibility. They serve as the bridge between your solar system and the utility grid, allowing you to track your solar power generation and electricity consumption accurately. Electric meters are silent workhorses of. Smart meters give solar users real-time control, showing both energy consumption and production to maximize solar efficiency.
