## Overview

---

Solar photovoltaic modules are where the electricity gets generated, but are only one of the many parts in a complete photovoltaic (PV) system. Below, you can find resources and information on the. Electricity, or a flow of electrons, is typically encountered in two forms: Direct Current (DC) where the electrons flow from the 'hot' or supply to ground which is typically seen in small electronics and is delivered in most photovoltaic cells. It is what will be examined in today's investigation.
