# **Solar container outdoor power supports fast charging**

## Overview

---

Lithium-ion battery technologies dominate modern solar containers due to superior energy density, cycle life exceeding 3,000-6,000 cycles, faster charging capabilities, and reduced maintenance compared to traditional lead-acid batteries. This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations. Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel unit for quick installation. Folding. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. These engineering wonders are great for many uses outside of merely transferring goods around the world, with one of the most common secondary uses being watertight storage units. That seemed like a great idea to put to use for all of my electric "toys". Between my electric bikes, e-motorcycles. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver.
