

Solar energy storage cabinet 500kWh product specifications cooperation

Overview

500kW power output with modular design, supporting expansion up to 1.5MWh (customizable based on your product specs). converters, energy management monitoring systems, power distribution of local load power, photovoltaic power generation priority is self-generation and self-use, and surplus electricity storage. The SUNSYS HES XL system is based on 2 standard cabinets - C-Cab, composed of a converter, an isolation transformer and a DC combiner, and B-Cab - that can be combined. The different systems with 500 kVA and 4 to 8 battery racks can then be installed in parallel to create multi-MegaWatt. Generac's SBE battery energy storage system is our latest addition to a portfolio of products and technologies helping commercial and industrial customers to meet their current and future energy goals. It has high energy density and a long cycle life. The box structure is compact and the space utilization is high. Designed with either on-grid (grid following) or hybrid (grid forming) PCS units, each BESS unit is capable of AC coupling to new or existing PV systems making them an ideal.
