## Overview

---

For solar-plus-storage—the pairing of solar photovoltaic (PV) and energy storage technologies—NLR researchers study and quantify the economic and grid impacts of distributed and utility-scale systems. The need for clean energy has never been more urgent. 2024 was the hottest year on record, with global temperatures reaching 1.55°C above pre-industrial levels. SigenStor is an AI-optimized 5-in-one energy storage system that brings your solar dream to reality, helping you achieve energy independence with maximum efficiency, savings, flexibility and resilience. By introducing solar energy to your home, we try to achieve a minimum of 50% average annual reduction in energy bills.
