

Solar outdoor power cabinet that can be connected to the winch

Overview

The 10-watt solar panel keeps the battery charge topped off between uses of the winch. Just set the battery case on the ground near your Shore Ramp in a place that gets at least a few hours of direct sunlight. Every lift comes standard with a manual motor option, which includes a key switch and a toggle switch for convenient hands-on operation. However, for added convenience and flexibility, we highly recommend upgrading to our Solar Charging Battery Case protects your 12v battery from the elements and keeps it charged so you can enjoy the convenience of using your Electric Winch Kit without worry about charging the battery. The Backup power: Supply power to the load when the power grid is out of power, or use as backup power in off-grid areas. Enhance power system stability: Smooth out the intermittent output of renewable energy by storing electricity and dispatching it when needed. Ameresco Solar supplies and distributes the Larson Electronics SPLT-1. 2K-LM25-EW-BC Solar Equipment Tower provides a safe and effective way for operators to quickly deploy devices to elevations up to twenty-five feet.

Solar outdoor power cabinet that can be connected to the winch
