

# **Solar panels can be equipped with flashing lights**

## Overview

---

Installing solar panels requires specialized flashing components to ensure waterproof, secure mounting on roofs, especially sloped ones. Alongside flashing, outdoor solar lighting and portable solar chargers enhance the utility and safety of solar-powered setups. Whether caused by insufficient battery capacity, faulty wiring, or incorrect sensor settings, inconsistent lighting can undermine the intended ambiance and functionality. This can not only diminish the aesthetic appeal of your outdoor area. If solar panel lights are continuously flashing, it indicates a problem that needs to be addressed.
