# **Solar power generation panels installed on rural roofs**

## Overview

---

Many agricultural buildings have large, unobstructed roof areas ideal for solar installations. Ground-mount options can utilize fallow land or integrate with grazing areas. When Mike Johnson, a third-generation dairy farmer from Wisconsin, installed a 150kW solar system on his century-old barn roof in 2024, he cut his annual electricity costs by \$18,000 – a 65% reduction that paid for the entire system in just 6. Across America, farmers. A solar panels for barn roof project offers a practical way to lower energy costs, increase resilience, and support sustainable farming practices. 50 per watt and reducing farm electricity expenses by 50-75%. While cities battle for rooftop real estate, country folks sit on acres of perfect.
