Solar power panel home evaluation

Overview

This comprehensive guide provides you with a complete assessment framework to determine if your house is suitable for solar panels. You'll learn how to evaluate your roof, analyze sun exposure, calculate potential savings, and use free tools to make an informed decision. Most homes can benefit from solar in 2025: With over 4.2 million American homes already equipped with solar panels and technology costs continuing to decline, the majority of homes with south, southeast, or southwest-facing roofs and minimal shading can achieve positive returns on solar investment. Your home needs to get plenty of sunlight, have a roof that is big enough and faces the right. We use Google Earth imagery to analyze your roof shape and local weather patterns to create a personalized solar plan. After you cover all four elements, you'll have a clear idea of whether your home is. Enter your address and the cost of your most recent electric bill Our estimator shows how many solar panels your home needs We generate an online cost and savings estimate You choose how many solar companies send you an exact price by email or text Click on your state for solar panels cost.
