

Solar system engineering costs

Overview

In 2025, the average cost of installing a residential solar panel system in the U. ranges between \$13,000 and \$18,000 before incentives, depending on factors such as location, system size, and equipment quality. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. The cost of a residential solar installation is a blend of physical hardware, the labor to install it, and a variety of administrative expenses known as soft costs.
