# **Special offer for 5MWh solar-powered containerized oil refineries**

## Overview

---

This paper proposes a solar-assisted method for a petrochemical refinery, considering hydrogen production deployed in Yanbu, Saudi Arabia, as a case study to greenize oil refineries. What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects. Applications used are off grid pipeline solar power. The 5MWh energy storage system containerized is a intelligent monitoring and high protection level, and is suitable for a variety of complex scenarios to meet the energy storage needs of the industrial and commercial sectors, the electric power grid, and renewable energy. The 5MWh energy storage. The 5MWh container energy storage system is a super cool solution that seamlessly combines different parts, like a Lithium iron phosphate battery, Battery Management System, Gaseous Fire Suppression System, and Environmental Control System, all packed into standardized containers. In addition to custom design, we offer a range of standard free-standing kits from 100-1100W. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client.
