Overview

Wenergy provides fully integrated, outdoor-rated ESS cabinets using LiFePO₄ technology with modular design and robust safety architecture. Our solutions are engineered for long-term operation, scalable expansion, and seamless integration into existing commercial and industrial power. Standardized Structure Design: Includes energy storage batteries, power conversion systems (PCS), photovoltaic modules, and charging modules in a compact and highly efficient cabinet. The Outdoor Photovoltaic Energy Cabinet is an all-in-one energy storage system with high strength, which can work under harsh environmental conditions to supply high-performance energy backup and regulation. The eMIMO architecture supports multiple input (grid, PV, genset) and output (12/24/48/57 V DC, 24/36/220 V AC) modes, integrating multiple energy sources into one. It adopts modular PCS for easy maintenance and expansion. As a professional manufacturer in China, produces both.
