# **Tax rate for solar power generation**

## Overview

---

The ITC is a onetime tax credit equal to a percentage of the amount invested in a wind or solar project. For electricity sold to an unrelated person and produced from the following renewable sources: wind, biomass, geothermal, solar, landfill and trash, hydropower, and marine and hydrokinetic. Tax benefits are available to taxpayers who generate their own electricity from solar power generation systems whether the system is for personal or business use. The tax. The 2022 reconciliation act (Public Law 117-169) made the ITC and PTC more generous for investments in projects that pay prevailing wages and employ apprentices, are located in certain geographic areas, and use domestically sourced materials. The credit for solar upgrades was extended through 2025, empowering more homeowners to switch to solar. Under this new law, homeowners who purchase their systems with cash or a loan will no longer be eligible for the 30% federal tax credit after Decem.
