

# Tesla energy storage system development history

## Overview

---

The Tesla Energy brand was introduced on April 1, 2015, as CEO Elon Musk announced that the company would apply its battery technology to a home energy storage system called the Powerwall. Five hundred pilot units were built at the Tesla Fremont Factory in California and Tesla Energy Operations, Inc. that develops, manufactures, sells and installs photovoltaic solar energy generation systems, battery energy storage products and other related products and services to residential, commercial and industrial customers. Doug is a Chartered Alternative Investment Analyst who spent more than 20 years as a derivatives market maker and asset manager before “reincarnating” as a financial media professional a decade ago. Reducing our reliance on fossil fuels and strengthening our. In 2025, the company deployed about 46.7 GWh of energy storage, with the energy segment generating roughly 12. Last year, the company's profit fell 45% compared with 2024, driven in large part by falling sales of its electric vehicles. Investors anticipated the decline in sales, but Tesla still beat Wall Street.
