# **The bigger the solar inverter the better**

## Overview

---

The size of the inverter should match the capacity of the solar panels. Therefore, you need to. In building a first off-grid or hybrid solar system, one of the most common mistakes is choosing an inverter that is far larger than the actual battery and PV array can support. Accurately assessing your electricity needs ensures your solar setup can reliably meet. So, is a bigger inverter better?

The answer is not a simple "yes" or "no" but depends on several factors. Here are some factors to consider: Firstly, you need to consider your load requirements.
