# **The place where the photovoltaic bracket is used**

## Overview

---

Ground-mounted brackets are used to install PV panels on the ground, while roof-mounted brackets are designed to attach panels to the roof of a building. The solar photovoltaic bracket, as an important part of the solar photovoltaic system, plays a vital role. Think of them as the skeleton that holds your solar panels in place - without proper support, even the most advanced panels can't deliver peak performance. It is environmentally friendly as well.
