# **The price of solar modules continues to fall**

## Overview

---

Prices have begun to fall after a brief stabilization phase – declining by around 5% to 8% across all technology classes in recent weeks. says Martin Schachinger, the founder of pvXchange. This means that prices are moving strongly back toward the level we saw at the beginning of the year, which can only be described as unhealthy for. For decades, one of the near-constants in the shift to renewable energy was that solar panel prices were decreasing. This downward curve hit a bump in 2020. At the time, analysts said the price. According to EnergySage's new Solar & Storage Marketplace Report, prices for both home solar and solar + storage reached record lows in the second half of 2024.

## The price of solar modules continues to fall

### Solar photovoltaic panel prices

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.

### Solar module prices on a clear downward trend

Prices have begun to fall after a brief stabilization phase - declining by around 5% to 8% across all technology classes in recent weeks. This drop returns prices to levels seen at the

### Solar Panel Prices Are Low Again. Here's Who's Winning and Losing

For decades, one of the near-constants in the shift to renewable energy was that solar panel prices were decreasing. This downward curve hit a bump in 2020.

### Home solar prices just hit record lows - and storage is

Battery-backed systems saw an even bigger price drop: home solar + storage quotes fell from \$2.59 per watt in H1 2024 to \$2.40 per watt in H2 2024.

Tesla's Powerwall 3 is playing a big role

## US solar module prices stabilise at US\$0.28/W in November

US solar PV module prices have stabilised at just over US\$0.28/W in the three months to November 2025, but this is likely to be a fragile state of affairs as a decision on Section 232

## New report reveals the cost of solar panels has dropped by 30% -- ...

According to the report, the median quoted price of solar decreased for the third year in a row, hitting its lowest in recorded data at \$2.50 per watt.

## Solar Panel Prices Have Dropped 80%

Solar panel prices have plummeted by over 70% in the past decade, transforming from a luxury investment into an accessible home upgrade that

pays for itself.
